- H.E. Mr. PICH Veasna, Director of Technical Service Center for Irrigation and Meteorology
- Mr. CHUM Sophy, Director of Prey Veng Provincial Department of Water Resources and Meteorology
- Ladies and gentlemen,

First of all, I would like to express the deepest condolences to the Royal Family, the Government and the people of the Kingdom of Cambodia for the passing of His Majesty King- Father Preah NORODOM SIHANOUK of Cambodia.

Today, we signed the contract of the Grant Assistance with Prey Veng Provincial Department of Water Resources and Meteorology for the Rehabilitation Project of Prey Kreul Irrigation System in Prey Veng Province.

Agriculture development, in particular, the increase of rice production is one of the highest priority targets for the development of Cambodia and the Government has been actively expanding and rehabilitating the irrigation systems across the country. The development of rice production increases farmers' incomes and reduces poverty in rural areas.

The Government of Japan, understanding the importance of the agriculture sector in Cambodia, has been assisting the efforts of the Government of Cambodia through development of irrigation systems and transfer of cultivation technology.

Today's grant amounting to USD 97,596 will be used to rehabilitate the reservoir embankment of 2,100m and the existing drainage structure, and to construct additional drainage and outlet structures. This Project is expected to benefit 1,275 households in the targeted area to have better access to irrigation water, to increase the productivity and to alleviate poverty.

I hope that the Project signed today will be implemented smoothly and the rehabilitated facilities will be maintained properly by Prey Veng Provincial Department of Water Resources and Meteorology.

Lastly, I sincerely hope that the project will further strengthen the friendly relations between Japanese and Cambodian people.

Thank you for your attention.
